EDUCATION

Graphic Era Hill University

B.Tech in Computer Science Engineering - CGPA - 7.62

September 2022 – Present

Uttarakhand, India

Doon International School

Intermediate - 86%

2021 – 2022

Uttarakhand, India

Doon International School

High School - 91%

2019 – 2020

Uttarakhand, India

INTERNSHIP

National Informatics Centre (NIC)

Web Development Intern

Remote – Dehradun

August 2025 - Present

- Contributing to the development of a web-based application to streamline the election duty assignment process, ensuring efficient allocation and management of personnel.
- Developing key features that facilitate the assignment of personnel to voting locations.

PROJECTS

Traffic OS Scheduler Simulation

February 2025

Operating Systems, Scheduling Algorithms, HTML, CSS, JavaScript

- * Designed and developed a real-time traffic signal simulator implementing Round Robin, Shortest Job First (SJF), and Priority Scheduling algorithms to optimize vehicle flow.
- * Generated an interactive web application (HTML, CSS, JavaScript) that simulated 100+ traffic scenarios, achieving up to 40% reduction in average vehicle wait time compared to naive scheduling approaches.

AI Virtual Mouse

December 2024

Computer Vision, Machine Learning, OpenCV, MediaPipe, TensorFlow, Python

- * Created a gesture-based mouse control system that eliminates the need for a physical mouse by detecting hand movements in real time using computer vision and machine learning.
- * Implemented hand-tracking and gesture recognition pipelines with OpenCV, MediaPipe, and TensorFlow to enable cursor movement, clicking, dragging, and scrolling with high accuracy.

VibeScript– Mini Programming Language with Smart IDE

July 2024

Compiler Design, Programming Languages, Python, HTML, CSS, JavaScript

- * Designed a beginner-focused programming language with Gen-Z inspired syntax to enhance engagement among first-time coders.
- * Developed a web-based smart IDE with a Python backend and intuitive frontend, reducing beginner coding errors by 43% during peer testing with 20+ students.

Traffic Sign Detection using YOLOv8

June 2024

Deep Learning, Computer Vision, YOLOv8, Python, OpenCV, Matplotlib

- * Built a YOLOv8-based deep learning model to detect and classify traffic signs with 92% mAP on validation data.
- * Processed and trained on 5,000+ labeled images, evaluating performance through Confusion Matrix and Matplotlib visualizations for accuracy and error analysis.

SKILLS

Programming Languages: C++, C, Python, Java, PHP, JavaScript, React, SQL

ACHIEVEMENTS & VOLUNTEERING

Competitive Programming Achievements

Solved over 300+ coding problems across platforms including LeetCode, HackerRank, GeeksforGeeks, and Codeforces. Gained hands-on experience in algorithm design, data structures.

Hack-O-Holic 24-Hour Hackathon | January 2025

Collaborated in a 24-hour software building sprint to develop innovative tech solutions under time constraints; enhanced skills in rapid prototyping, teamwork.
